

# DAY 1 - Colab Step by Step Instructions

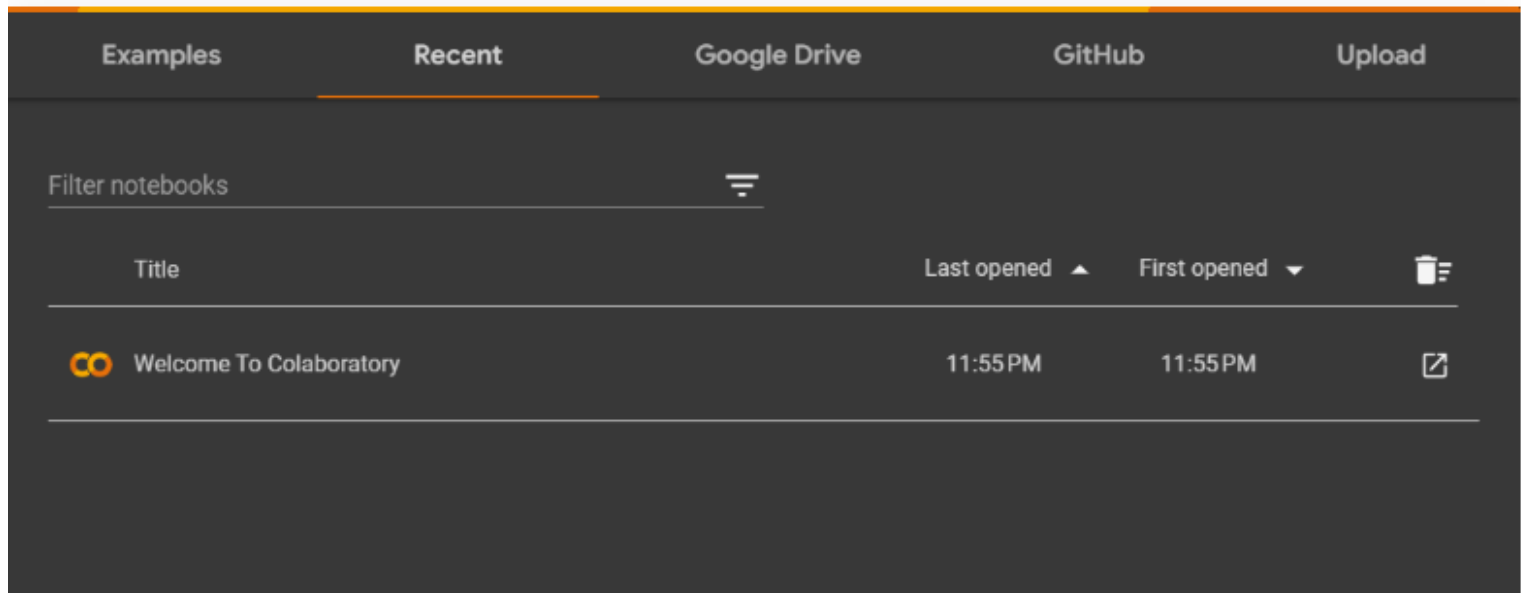

Win7, 10, 11

## How to Download Google Colab as a PDF: Step by Step

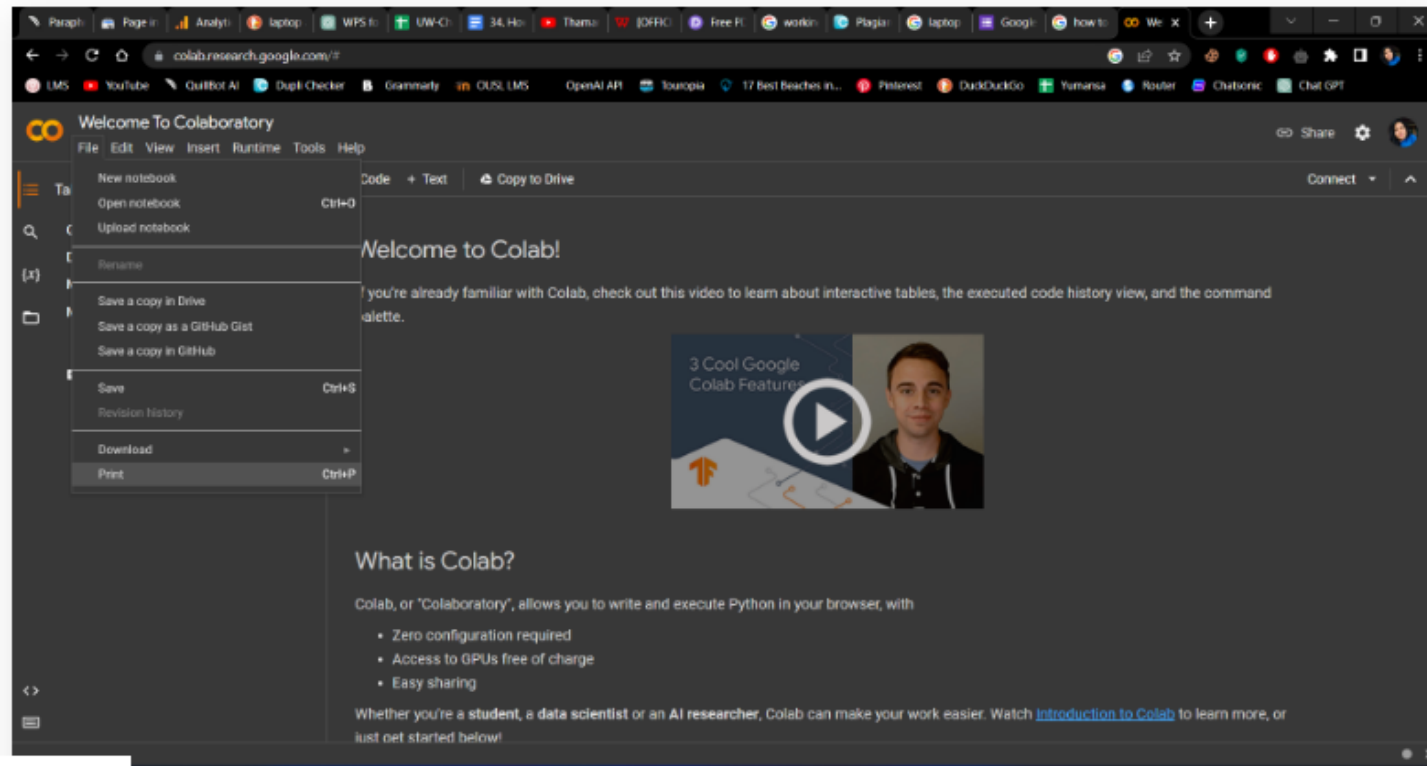

Step 1: Open Google Colab

To download Google Colab as a pdf, you need to open Google Colab in your web browser. Go to [colab.research.google.com](https://colab.research.google.com) and sign in to your Google account. You'll be taken to the Colab homepage.

Step 2: Open the notebook you want to download

If you haven't created a notebook, you can create a new one by clicking the "+ NEW NOTEBOOK" button on the Colab homepage. Once your notebook is open, go to "File" in the top menu and select "Print."

### Step 3: Choose "Save as pdf"

After clicking "Print," you'll see a print preview of your notebook. Select "Save as pdf" from the dropdown menu of available printers from here.

#### Getting started

The document you are reading is not a static web page, but an interactive environment called a **Colab notebook** that lets you write and execute code.

For example, here is a **code cell** with a short Python script that computes a value, stores it in a variable, and prints the result:

```
seconds_in_a_day = 24 * 60 * 60
seconds_in_a_day
```

86400

To execute the code in the above cell, select it with a click and then either press the play button to the left of the code, or use the keyboard shortcut "Command/Ctrl+Enter". To edit the code, just click

<https://colab.research.google.com/WypmIMednIue> 1/5

2/26/23, 11:57 PM Welcome To Colaboratory - Colaboratory

the cell and start editing.

Variables that you define in one cell can later be used in other cells:

```
seconds_in_a_week = 7 * seconds_in_a_day
seconds_in_a_week
```

604800

Colab notebooks allow you to combine **executable code** and **rich text** in a single document, along with **images**, **HTML**, **LaTeX** and more. When you create your own Colab notebooks, they are stored in your Google Drive account. You can easily share your Colab notebooks with co-workers or friends, allowing them to comment on your notebooks or even edit them. To learn more, see [Overview of Colab](#). To create a new Colab notebook you can use the File menu above, or use the following link: [create a new Colab notebook](#).

Colab notebooks are Jupyter notebooks that are hosted by Colab. To learn more about the Jupyter project, see [jupyter.org](#).

## Step 4: Customize your pdf settings

Once you've selected "Save as pdf," you can customize your pdf settings. You can choose your pdf file's paper size, orientation, margins, and scale. After customizing your settings, click "Save" to save your pdf.
